

Documentaries- BBC iPlayer, Sir David Attenborough

The BBC iPlayer currently has many of the Sir David Attenborough box sets available including; Blue Planet, Life, Planet Earth, Africa, and Seven Worlds, One Planet. These are full of wonderful stories about amazing animals and their adaptations and the more recent series also focus on the human impact on the environment.

After watching, children could show their understanding through:

- Writing about their favourite animal featured in the show
- A letter to Sir David Attenborough about what they liked and questions they have
- A letter to humans from an animal explaining how we are impacting their environment and what we should do
